

Jordi Moca

SENIOR PRODUCT DESIGNER

Barcelona, Spain | jordimoca@gmail.com | jordimoca.com | linkedin.com/in/jordimoca

Professional Summary

Senior Product Designer with ten years in healthcare, digital banking and high-traffic digital media, focused on dense, multi-state interfaces for professional users. Reference designer for a medical prescription product used by doctors, owning its end-to-end UX/UI and design system, and co-builder of the Cegedim corporate design system. Front-end background (HTML, CSS, SASS, JavaScript, React) and an AI-assisted workflow with Claude for benchmarking and prototyping.

Experience

Mar 2022 – Present

Senior Product Designer

Cegedim · Barcelona

Healthcare software for doctors, physiotherapists and clinic staff across four products: MLM, Maiia, Maiia Agenda and Maiia Kiné.

- Own the end-to-end UX/UI of MLM (medical prescription software) as its reference designer: flows, information architecture, wireframes, high-fidelity UI and prototypes for dense, regulated screens.
- Run an AI-assisted design workflow with Claude: competitor benchmarks for each feature, iterations built from existing design system components, and interactive prototypes to decide with the PM before designing the agreed solution in Figma.
- Redesigned the prescription workflow (2025): built a Figma proof of concept showing the assigned brief would not fix the real problem, the lack of vertical space, and relied on components the corporate library did not yet have.
- Aligned the architect, PM and PO on the trade-off, avoiding a third, hybrid component library, and shipped a modular layout that keeps search and the ongoing prescription one click away, validated by the Product Committee (a fortnightly panel of doctors).
- Initiated, without a brief, a settings dashboard that centralises the parameters of eight sections. It shipped in the same release, changed the roadmap and drew positive feedback from two of the most important clients.
- Build and maintain the MLM design system as its sole designer, and co-build the Cegedim corporate design system with the France team as its only member in Spain, defining component scope and dependencies across four products.
- Drove the decision to migrate MLM to the corporate design system and set the rule in force since June 2026: every new full section, modal and full-width dialog is built in the corporate system.

Feb 2018 – Mar 2022

UI Developer & UX/UI Designer

Grupo Godó · Barcelona

Digital media group: La Vanguardia, Mundo Deportivo and RAC1.

- Designed and built UI in production code (HTML5, CSS3, SASS, JavaScript) for three high-traffic brands, including dashboards and onboarding.
- Designed and developed from scratch, on a shared design system, the user account areas of La Vanguardia and Mundo Deportivo, still in use today.
- Refactored CSS and JavaScript across all sites to improve front-end performance and maintainability.
- Seconded to Yaencontre, the group's real estate marketplace (Feb – Jun 2018), to design flows and screens and fix UX/UI inconsistencies before its launch.

Apr 2016 – Feb 2018

UX/UI Designer

Innofis / Crealogix · Barcelona

Digital banking software for international financial institutions.

- Designed onboarding, transfers, personal finance management (PFM) and dashboards for mobile apps, responsive web and tablet.

2015 – 2016

UX/UI Designer (Internship)

Respondon · Barcelona

- Designed information architecture, web and mobile interfaces and the brand style guide.

Skills

Product design	End-to-end UX/UI design, problem framing, proofs of concept, information architecture, interaction design, user flows, wireframing, prototyping
Design systems	Atomic Design, component libraries, foundations, multi-product and cross-platform consistency, design system migration, accessibility (WCAG 2.1 AA)
Collaboration	Stakeholder alignment (architects, PMs, POs), Agile, Scrum
AI	AI-assisted design (Claude): benchmarking, iteration, interactive prototyping
Tools	Figma, FigJam, Claude, Jira, Confluence
Front-end	HTML5, CSS3, SASS, JavaScript, React, Git

Languages

Spanish (native), Catalan (native), English (advanced, C1; daily professional use)

Education and Certification

2013 – 2016	Bachelor's Degree in Multimedia , Universitat Oberta de Catalunya (UOC)
2007 – 2011	Technical Engineering in Public Works, Civil Construction , Universitat Politècnica de Catalunya (UPC)
2025	Figma Camp Certified , Edition 19, by Raul Marín Calleja
